

Seminars of Thursday

INTERDISCIPLINARY BIOMEDICAL RESEARCH SEMINARS

ULB - Campus Erasme - Building B, Room B1.003

13:00 -14:00

March 2012

March 01

F. Fuks

Jason Carroll

Cambridge Research Institute

“Understanding estrogen receptor transcription in breast cancer”

March 08

J-E Dumont

J-F Collet

Université Catholique de Louvain

**“Diversity of reducing pathways in the oxidizing environment
of the bacterial cell envelope”**

March 15

P. Vanderhaeghen

Juan Burrone

MRC Centre for Developmental Neurobiology

King's College London

**“Visualizing the formation and maturation of
functional synaptic contacts”**

March 22

G. Vassart

Peter Mombaerts

Max Planck Institute of Biophysics

Frankfurt

“Coding olfaction”

March 29

P. Vanderhaeghen

Andrea Brand

Gurdon Institute of Cancer and Developmental Biology

University of Cambridge

**“Stem cells to synapses: regulation of self-renewal and
differentiation in the nervous system”**
